

Customer Installation Standards Update

Approved Options

Underground Power Panels

(combo meter pan and breakers)

Or

Single UG meter pans

(used with separate breaker panels)

Effective Last Revision June 2008 April, 2013

Midwest UG Power Panel

Example shown: Model #

ETG series

General Description for all UG fed, combo meter pan and breaker panel:

- ➤ No wire bending required;
- >Utility wire-way separately and independently covered and secured;
- >Customer wire-way separately and independently covered and secured;
- ➤ May be side-wired or bottom-connected;

(Model numbers may vary based on amperage, number of breakers allowed and whether aluminum or steel)

...or...the single UG meter pan with side-wire connections and separate breaker panel is still acceptable.

Midwest

Example shown: Model #

UTRS223AMEP

Eaton UG Power Panel

Example shown: Model #

MBE48B200BTS

General Description for all UG fed, combo meter pan and breaker panel:

- ➤ No wire bending required;
- ➤ Utility wire-way separately and independently covered and secured;
- >Customer wire-way separately and independently covered and secured;
- ➤ May be side-wired or bottom-connected;

(Model numbers may vary based on amperage, number of breakers allowed and whether aluminum or steel)

...or...the single UG meter pan with side-wire connections and separate breaker panel is still acceptable.

Eaton-Durham

Example shown: Model #

UTRS223ACH

Milbanks UG Power Panel

Example shown: Model #

U5898-O-200

General Description for all UG fed, combo meter pan and breaker panel:

- ➤ No wire bending required;
- >Utility wire-way separately and independently covered and secured;
- ➤ Customer wire-way separately and independently covered and secured;
- ➤ May be side-wired or bottom-connected;

(Model numbers may vary based on amperage, number of breakers allowed and whether aluminum or steel)

...or...the single UG meter pan with side-wire connections and separate breaker panel is still acceptable.

Milbank

Example shown: Model #

U1980-O

Square D UG Power Panel

Example shown: Model #

SC816F200S

General Description for all UG fed, combo meter pan and breaker panel:

- ➤ No wire bending required;
- ➤ Utility wire-way separately and independently covered and secured;
- >Customer wire-way separately and independently covered and secured;
- ➤ May be side-wired or bottom-connected;

(Model numbers may vary based on amperage, number of breakers allowed and whether aluminum or steel)

...or...the single UG meter pan with side-wire connections and separate breaker panel is still acceptable.

Siemens UG Power Panel

Example shown: Model #

MC0816B1200RTD

and Landis & Gyr UG Power panel

Example shown: Model #

LG0816B1200RTD

(Siemens brands their pans for both companies.)

- ➤ No wire bending required;
- ➤ Utility wire-way separately and independently covered and secured;
- Customer wire-way separately and independently covered and secured;
- ➤ May be side-wired or bottom-connected;

(Model numbers may vary based on amperage, number of breakers allowed and whether aluminum or steel)

...or...the single UG meter pan with side-wire connections and separate breaker panel is still acceptable.
